

Safety Data Sheets (SDSs) & Related Services

Award-Winning Consultancy Providing Innovative Solutions
to Meet Regulatory and Environmental Challenges

Safety Data Sheet (SDS) Authoring

CSI combines human expertise with advanced SDS software to create quality and affordable SDSs for your products that comply with the latest legislation. Product classifications are reviewed by our experts, draft SDSs are generated using state of the art software, then reviewed by our consultants before finalisation. In addition to SDSs, CSI can generate Classification, Labelling and Packaging (CLP) labelling and Transportation Classification labelling, as well as EU Poison Centre Notifications (PCNs).

What, Why and Who?

SDSs document the hazards of a product and include advice on precautionary measures to follow with respect to safe handling, transportation, spillage, storage, and disposal. This information allows employers to carry out risk assessment as required in the UK by the Control of Substances Hazardous to Health Regulations (COSHH), ensuring those who use chemicals in the workplace use them safely without risk of harm to users or the environment.

Poison Centre Notifications (PCNs)

In 2021, the EU harmonised information requirements for mixtures classified as hazardous for human health or physical effects. This information is submitted as a PCN to EU Member States to be used for emergency health responses. CSI can submit voluntary submissions on behalf of non-EU suppliers or importers and distributors.

Translations

CSI is able to translate SDS documents, CLP labelling and Transportation labelling into 54 languages. This includes all 24 EU languages required for SDSs and labels of products sold in the EU.

Product Labels

Labels of hazardous products must conform to GB/EU CLP Regulations. CSI can generate CLP compliant labels for GB and EU markets. In the EU, all hazardous product labels must now carry a Unique Formula Identifier (UFI) corresponding to the PCN. CSI can also supply Transportation Classification labelling for products with UN Numbers.

Branding

Company branding is an important feature for many of our clients. CSI is able to include company logos and adapt the SDS document colour scheme to match company branding.
